Tecra™

8100 Series

HDD REMOVAL

HDD

HDD bracket

HDD connector

M3x4 flat head brass screws

- Remove **four M3x4 flat head brass screws** securing the HDD to the bracket and lift the drive out of the **bracket**
- Unplug the **HDD connector** from the drive

MODEM BOARD REMOVAL

Modem module

M2.5x4 flat head black screws

- Remove **four M2.5x4 flat head black screws** securing the module
- Lift gently to disconnect the **modem module** from the system board

KEYBOARD REMOVAL

Latch

Keyboard

Case separator

Keyboard holder

- Open the display panel
- Using the **case separator**, unlatch the **keyboard holder** at the top of the **keyboard**

NOTE: When installing the keyboard holder do not press on the area above F6&F7 keys. Pressing the F6&F7 area may bend the aluminum plate causing the F&W to generate noise.

KEYBOARD REMOVAL

Keyboard

Keyboard cable

P J580

- Remove **one M2.5x3 black** securing the keyboard
- Lift out the **keyboard** and set it as shown above
- Disconnect the **keyboard cable** from **P J580** on the system board
